## SOFTWARE DEVELOPER AND ARCHITECT

### PROFESSIONAL EXPERIENCE

#### 株式会社エムアイメイズ

Dec 2020 - Present

##### Software Developer

- Went from learning [Flutter](#) to delivering over 20 features to leading a two person development team in a span of around 8 months by consistently integrating industry best practices in my work.
- Reduced deploy time by more than 75% by implementing CI/CD pipeline using [AWS](#) and [Github Actions](#) for both Android and iOS by streamlining and documenting the deployment cycle.
- Implemented app wide design after a major design update in half a week to make it in time for a production release.

#### Ajaibghar

##### Freelance Creative Technologist

- Straddling the role of a designer and a developer, implemented the core generative visual system for an interactive web experience project using [Vue.js](#) and [Strapi](#).
- Created interactive fiction systems by working as the systems architect, developer and co-designer on an interactive storytelling / fiction web experience built using a [Javascript Full-Stack](#).

### Personal Projects

- Selected for speaking at JSConf Japan by designing and creating a creative coding library in [Typescript](#).
  - [Led a workshop](#) on visual live coding with Punctual for a group of beginners at a creative coding community conference supported by the Processing Foundation.
  - Continuously developing methods for better documenting the work of people at the intersection of art and technology in the role of a [community organiser](#) for CCSanté, a monthly creative coding meetup.
-
